

PTH 6125: Patient/Client Management II

Department of Physical Therapy
Fall 2026

Mode of delivery: In person lecture and lab

- *Scheduled days and times:*
- **Lecture:**
 - **Days:** Monday & Wednesday
 - **Time:** 8:00 am – 9:15 am
 - **Location:** Samuel Read Hall, Room 103
- **Labs:**
 - **Monday (Group A) & Wednesday (Group B)**
 - **Time:** 9:30 am – 12:30 pm
 - **Location:** Samuel Read Hall, Room 213

Course Information:

Semester: Fall 2024

Credit Hours: 4

Weekly Clock Hours: 6	Lecture: 3	Lab: 3
-----------------------	------------	--------

Semester Clock Hours: 90	Lecture: 45	Lab: 45
--------------------------	-------------	---------

Instructors:

Janine DeBaets PT, DPT, OCS
jmdebaets@plymouth.edu

Office: 203

Office hours: Wednesdays 12:30-2:00 and Fridays 12:30-2:00
Available by appointment via email

Teaching Assistants (Open Lab and Tutoring Times to be Announced):

Pre Requisites: Clinical & Functional Anatomy, Clinical Physiology, Patient/ Client Management I, Ethics & Value Systems, Integrated Clinical I

Co Requisites: I Dynamic Systems I, Clinical Inquiry I: Causality & Inference, Musculoskeletal Conditions & Management, Neuroscience, Integrated Clinical II

Course Description:

Patient / Client Management II includes both classroom and laboratory sessions on screening, examination, evaluation, diagnosis, prognosis, and intervention (plan of care and management of care delivery). The scaffold previously established continues to develop depth by incorporating previous (pre requisite) and concurrent (co-requisite) program content including the integrated clinical.

Patient / Client Management II covers the performance of essential components of basic physical therapy examination and evaluation including balance, nerve integrity, gait, integumentary integrity, joint integrity, and mobility, neuromotor development and sensory processing, pain, posture, range of motion, reflex integrity, sensory integrity, and skeletal integrity. As well as interventions including biophysical agents, functional training in self-care, domestic, education, work; community; social; and civic life, integumentary repair & protection, basic manual therapy techniques, patient/client education and therapeutic exercise.

Student Learning Outcomes

1. Selects and utilizes appropriate teaching methods commensurate with the needs of the learner. (7D12)
2. Explain screening and the physiological, anatomical, and musculoskeletal factors that contribute to determining whether patients/clients need further examination or consultation by a physical therapist or referral to another health care professional (7D16)
 - a. Understand the physical therapist's professional role in the referral to or provision of services, and in follow-up for those services.
 - b. Ensure that the informed-consent process for testing includes appropriate information about the potential risks, benefits and limitations of the test in question
3. Explain and summarize a basic history and relevant information from the patient/client and from other sources as needed. (7D17)
4. Explain a systems review. Including the cardiovascular/pulmonary system through the assessment of blood pressure, heart rate, respiration rate, and edema; the integumentary system through the gross assessment of skin color, turgor (swelling), integrity, and the presence of scar; the musculoskeletal system through the gross assessment of range of motion, strength, symmetry, height, and weight. (7D18)
5. Show how to perform physical therapy tests and measures and factors that influence their use based on patients age; diagnosis and health status including: Balance, Gait, Integumentary Integrity, Functional strength testing; Muscle strength, including manual muscle testing, dynamometry with basic cases in a structured clinical practice condition. (7D19)
6. Explain and summarize data from the examination (history, health record, systems review, and tests and measures) to make clinical judgments. (7D20)
7. Explain how data from the examination procedures covered relates to components, and their interactions, of the International Classification of Function (ICF) to describe a patient's/clients impairments; activity and participation limitations. (7D21)
8. Describe how manual therapy techniques, biophysical agents, therapeutic exercise, functional training, and patient/client education fit into a safe and effective plan of care that is developed

in collaboration with appropriate stakeholders; including patients/clients; family members; payors; other professionals and other appropriate individuals. (7D24)

9. Explain when manual therapy techniques, biophysical agents, therapeutic exercise, functional training and patient/client education that may; or may not; be directed to the physical therapist assistant (PTA) based on (a) the needs of the patient/client; (b) the role; education; and training of the PTA; (c) competence of the individual PTA; (d) jurisdictional law; (e) practice guidelines policies; and (f) facility policies. (7D25)
10. Show how to perform physical therapy interventions to achieve patient/client goals and outcomes, including: manual therapy techniques, biophysical agents (electrotherapeutic, physical and mechanical modalities), integumentary repair and protection, therapeutic exercise, functional training and patient/client education in a basic case in a structured clinical practice environment. (7D27)
11. Explain what is necessary to manage the delivery of the plan of care that is consistent with professional obligations; inter professional collaborations; and administrative policies and procedures of the practice environment. (7D28)
12. Explain the process of monitoring and adjusting the plan of care in response to patient/client status. (7D30)
13. Demonstrate accurate documentation that follows guidelines and specific documentation formats required by state practice acts; the practice setting; and other regulatory agencies. (7D32)

Required Materials:

- Manual Mobilization of the Joints Volume I: The Extremities, 8th Edition Kaltenborn
- Readings will be assigned, as needed each class from various sources
- Subscription to PhysioU is required for this course CPR Ortho <https://app.physiou.com/>

(NeuroNotes)

Description of teaching methods and learning experiences

Lectures, Laboratory sessions, group discussions, presentations

Assignments and Activities

Midterm Exam	25%
Presentation & assignments	10%
Quizzes	10%
Final exam	30%
OSCE	25%

Exams

There will be a midterm and a commutative final exam for this course on all given readings, lectures, and labs.

Quizzes

Quizzes are given before the days scheduled lecture in class. There is a quiz at the end of each module. Questions are created from required readings and information in recorded lectures. The first quiz, during week 2, will have 5 questions to get the student prepared for the type of questions asked. Quiz schedule is on lecture schedule outline.

Presentations

Group Presentation are built into lecture time. There are 7 topics to be covered with groups of 4 or 5. Topics are Kinesio taping, Cupping, Dry needling, Biofeedback, Blood flow restriction, Scoliosis Specific exercises, Instrumental assisted soft tissue massage (IASTM). Presentations should include a description of treatment, physiological effects, evidence support, and cases for application. There will also be a group project of collaboration between PTs and PTA.

Assignment

First-Year PT/PTA Collaborative between Plymouth State University and River Valley Community College. For this interprofessional group activity, you will be given your group members by your faculty. You should work in your professional group with your classmates and SPTAs and review the patient evaluation and prepare answers to the Case Study questions. Following the meeting, you will have a reflection to complete. Ticket to class assignments is to be done to attend class. Without submission of assignment, you may not attend any part of class that day. All other assignments are due on due date provide.

Objective Structured Clinical Examination (OSCE)

For general background see the DPT Student Handbook; for specific content for PCM IV OSCE see the OSCE IV Content as part of this syllabus. Note, content for the OSCE is an integration of material from all courses in the semester with PCM, along with a cumulative expectation from all prior courses.

OSCE Failure

OSCE grades are incorporated into the PCM course grades. Successfully completing each OSCE requires a grade of at least 73%. An OSCE grade of less than 73% results in a PCM course grade of an F. There are elements to an OSCE grade that are considered safety concerns and failure in an element related to a safety concern can result in immediate failure of the OSCE. If a student fails an OSCE, he/she can repeat one time and achieve a maximal grade of a 73%. Prior to the repeat OSCE the student must meet with the PCM course coordinator to review the OSCE results, develop a remediation plan and make plans for the repeat OSCE. The repeat OSCE will be a subset of the full OSCE, including only the elements that clearly led to failure.

Student Evaluation/Grading Scale

A	94.0 – 100
A-	90.0 – 93.9
B+	87.0 – 89.9
B	83.0 – 86.9
B-	80.0 – 82.9

C+	77.0 – 79.9
C	73.0 – 76.9
F	below 73.0

Students are reminded that continuation in the program necessitates achieving an overall grade point average of 3.0 (B) or better. Grades below 2.0 (C) are not acceptable or counted toward the DPT degree. No more than 10 credits below 3.0 may be counted toward the DPT degree (grades of B-, C+, or C). Make-up examinations will be given only in specific cases of absence (documented absences). Circumstances that may warrant an absence should be discussed with the instructor before the scheduled time of the exam. Failure to notify the instructor as stated may result in a zero for the exam.

Professional Conduct: Students are reminded of the program expectation that they follow Professional Conduct, see the Student Handbook, Professional Conduct and Reasonable Professional Expectations for the process of handling violations, remediation, and consequences. Violations of Professional Conduct (such as unexcused absences or failure to complete assignments or prepare for class discussions) will result in a verbal warning. Continued violation will result in a written notification of a grade reduction of up **to 10%**. Violations of Professional Conduct that reach an egregious level, such as cheating on a quiz or exam, will result in immediate failure of that quiz or exam

Cell Phones: Cell phone use (including texting) is prohibited in class. Also, please respect your classmates by turning your phone to vibrate prior to class start time. Do not turn phones off as the University uses texts to relate emergency information.

Graduate Academic Policies: The DPT Program is a selective admissions cohort-structured program. Some Graduate Academic Policies may not be relevant to the program. Students should refer to the Doctor of Physical Therapy Program Handbook for specific information about Scheduling, Capstones, and Internships. The sections on Grading System and Academic Standing Policy do apply to

DPT students: <https://coursecatalog.plymouth.edu/university-policies-procedures/graduate-academic-policies/>

Fair Grading Policy: Fair and equitable grading reflects values to which all members of the Plymouth State community commit themselves. Grades are used to assess the relative extent to which students achieve course objectives in all for-credit courses at PSU. Academic freedom allows instructors to determine course objectives within the bounds of established curricula, and the means by which a student's mastery of those objectives will be evaluated; and evaluate the quality of work on individual exams or assignments. Information can be found at <https://coursecatalog.plymouth.edu/university-policies-procedures/> under Fair Grading.

Student Support: Student Support Foundation (SSF) provides short-term emergency financial assistance and long-term student support. For more information, see:

<https://campus.plymouth.edu/student-support-foundation/>

Student Support Foundation also runs a food pantry, located in Belknap Hall. To learn more about SSF or access the food pantry, either via open hours or a private appointment, contact the SSF advisor, at psu-ssf@plymouth.edu.

Academic Dishonesty: Cheating and plagiarism are very serious forms of academic dishonesty. Any use of unauthorized assistance on exams, papers, homework assignments, or other course work constitutes cheating. Knowingly providing assistance during an exam or allowing other students to copy one's work is also a serious form of academic dishonesty. Plagiarism consists of submitting written work that has been developed wholly or partially by someone else. Submitting written work in which the ideas of others have been duplicated or even paraphrased without proper reference to the author is also a form of plagiarism. Also considered plagiarism is the acquisition of term papers or other assignments from another source and subsequent presentation of these materials as the student's own work. In addition, students may not use papers in more than one course without the permission of both instructors.

Any student suspected of academic dishonesty will be reported to the Program Director immediately. A full description of academic integrity, violations and procedures when a violation to academic integrity in a course is suspected can be found at: <https://coursecatalog.plymouth.edu/university-policies-procedures/> under Academic Integrity.

Artificial Intelligence (AI) Use Policy

Artificial Intelligence (AI) tools such as ChatGPT, Microsoft Copilot, Gemini, and similar technologies may be used in this course **when permitted by the instructor**. AI can be a valuable learning tool, but it should support, not replace your own critical thinking, clinical reasoning, and professional judgment.

Appropriate Uses

Unless otherwise stated for a specific assignment, AI may be used to:

- Clarify or explain difficult concepts.
- Generate study questions, practice cases, or study aids.
- Brainstorm ideas or organize information.
- Improve grammar, clarity, or organization of writing.
- Practice clinical scenarios or communication skills.
- Support learning after you have first attempted to work through the material independently.

Inappropriate Uses

Students may not use AI to:

- Complete quizzes, exams, practicals, OSCEs, competency assessments, or other individual assessments unless specifically authorized.
- Complete assignments or clinical reasoning activities that are intended to demonstrate the student's independent knowledge or decision-making.
- Submit AI-generated content as their own work without appropriate acknowledgment.
- Generate or fabricate references, data, clinical findings, or documentation.
- Enter protected health information (PHI), personally identifiable information, or other confidential information into an AI platform.

Student Responsibility

Students are responsible for **everything they submit**, including material developed with the assistance of AI. AI-generated information may be inaccurate, incomplete, biased, or fabricated. Students are

expected to verify information using course materials, credible scholarly sources, and appropriate clinical resources.

AI should help you think—not do the thinking for you.

Assignment-Specific Guidelines

AI expectations may vary by assignment. An instructor may identify an activity as:

- **AI Permitted**
- **AI Permitted with Disclosure**
- **AI Restricted**
- **AI Prohibited**

Assignment-specific instructions supersede this general policy. If you are unsure whether AI is permitted, ask the instructor before using it.

Disclosure

When AI contributes meaningfully to submitted work, students may be asked to briefly disclose how it was used. For example:

"ChatGPT was used to help organize ideas and improve clarity. The final content, clinical reasoning, references, and conclusions were developed and verified by the student."

Academic Integrity and Professionalism

Use of AI that violates course or assignment expectations may be considered an academic integrity and/or professional behavior concern and will be addressed according to university and DPT program policies.

Attendance Policy: Attendance is expected to all class sessions. Students are ultimately responsible for their attendance, however faculty will assess students' Professional Expectations based, in part, on their attendance (See Student Evaluation/Grading). Students who miss class for any reason are responsible for the information and work missed. Students should speak with the professor before missing the scheduled class when able.

Campus Accessibility Policy: Plymouth State University is committed to providing students with documented disabilities equal access to all university programs and facilities. If you think you have a disability requiring accommodations, you should immediately contact Campus Accessibility Services (CAS) in Speare 210 (535-3300) to determine whether you are eligible for such accommodations.

Academic accommodations will only be considered for students who have registered with CAS. If you have a Letter of Accommodation for this course from CAS, please provide the instructor with that information privately so that you and the instructor can review those accommodations:

<https://campus.plymouth.edu/accessibility-services/>

LibGuide for Physical Therapy:

The Libguide for Physical Therapy is an information sharing platform created through a collaboration between the library and the DPT faculty that presents relevant resources to support students in the Physical Therapy program. Examples of information you will find include tutorials to better understand citing sources in APA and AMA style, resources on how to avoid plagiarism, quick access to relevant databases and interlibrary loan as well as a contact link to the programs' assigned librarian. To view the DPT Program Libguide go to <https://library.plymouth.edu/physical-therapy>.

Diversity and Inclusivity Statement:

We consider this classroom to be a place where you will be treated with respect, and we welcome individuals of all ages, backgrounds, beliefs, ethnicities, genders, gender identities, gender expressions, national origins, religious affiliations, sexual orientations, ability - and other visible and non-visible differences. All members of this class are expected to contribute to a respectful, welcoming and inclusive environment for every other member of the class. See this web page for the Plymouth State University IDEA Center Inclusion, Diversity, Equity, and Access. <https://www.plymouth.edu/idea-center>

Tentative Class Schedule:

Week	Date	Lecture Topic	Lab	Group Presentation	Quiz / Exam / Assignment
	Mon. Aug. 31	Introduction to Therapeutic Interventions; Movement System; Guide to PT Practice; Regional Interdependence	Lab 1 – Group A: Special Tests	—	—
	Wed. Sept. 2	Tissue Behavior, Injury & Healing	Lab 1 – Group B: Special Tests	—	—
	Mon. Sept. 7	NO CLASS – Labor Day	—	—	—
	Wed. Sept. 9	Connective Tissue Interventions: SINSS & Optimal Loading	Lab 2 – Group B: Soft Tissue Mobilization	—	Quiz: Introduction / Tissue Behavior
	Mon. Sept. 14	Pain Management I	Lab 2 – Group A: Soft Tissue Mobilization	—	Quiz: SINSS & Optimal Loading

Week	Date	Lecture Topic	Lab	Group Presentation	Quiz / Exam / Assignment
	Wed. Sept. 16	Pain Management II	Lab 3 – Group B: Cryotherapy & Thermotherapy		Facilitators should have reached out to PTA for meeting time by now.
	Mon. Sept. 21	Cryotherapy & Thermotherapy	Lab 3 – Group A: Cryotherapy & Thermotherapy	—	Quiz: Pain Management I & II
	Wed. Sept. 23	Ultrasound and Phonophoresis	Lab 4 – Group B: Therapeutic Ultrasound	—	Quiz: Cryotherapy & Thermotherapy
	Mon. Sept. 28	Extracorporeal Shock Wave Therapy (ESWT)	Lab 4 – Group A: Therapeutic Ultrasound		—
	Wed. Sept. 30	Sensory-Level Electrical Stimulation I: Electrical principles, TENS & IFC	Lab 5 – Group B: Sensory-Level E-Stim (TENS/IFC)	—	Quiz: Ultrasound/ Extracorporeal Shock Wave Therapy (ESWT)
	Mon. Oct. 5	Sensory-Level Electrical Stimulation II: Parameter selection, pain modulation & clinical application	Lab 5 – Group A: Sensory-Level E-Stim (TENS/IFC)	—	—
	Wed. Oct. 7	NMES I: Motor-level stimulation, physiology & parameters	Lab 6 – Group B: NMES (Motor-Level E-Stim)		Quiz: Sensory-Level E-Stim
	Mon. Oct. 12	NMES II: Clinical application, parameter selection & cases	Lab 6 – Group A: NMES (Motor-Level E-Stim)		—
	Wed. Oct. 14	MIDTERM EXAM	Lab 7 – Group B: Traction	—	MIDTERM EXAM
	Mon. Oct. 19	Traction & Compression	Lab 7 – Group A: Traction	—	Quiz: NMES Meet with classmates to prepare for your PT/PTA assignment
	Wed. Oct. 21	Joint Assessment & Mobilization I	Lab 8 – Group B: Joint Mobilization	—	Quiz: Traction & Compression
	Mon. Oct. 26	Joint Assessment & Mobilization II: Treatment	Lab 8 – Group A: Joint Mobilization	—	—
	Wed. Oct. 28	Motor Development, Balance & Stability	Lab 9 – Group B: Balance	—	Quiz: Joint Assessment & Mobilization & II
	Mon. Nov. 2	Body Mechanics, Posture & Balance	Lab 9 – Group A: Balance	—	—
	Wed. Nov. 4	Therapeutic Exercise I	Lab 10 – Group B: Stretching & Therapeutic Exercise	—	Quiz: Motor Development, Balance, Stability, Body Mechanics & Posture

Week	Date	Lecture Topic	Lab	Group Presentation	Quiz / Exam / Assignment
	Mon. Nov. 9	Therapeutic Exercise II	Lab 10 – Group A: Stretching & Therapeutic Exercise	—	—
	Wed. Nov. 11	NO CLASS – Veterans Day	—	—	—
	Mon. Nov. 16	PNF	Lab 12 -Group A: PNF		Quiz: Therapeutic Exercise I & II
	Wed. Nov. 18	Special Topics / Clinical Application	Lab 12 – Group B: PNF	Scoliosis-Specific Exercise	Assignment due with River Valley PTA collaboration
	Mon. Nov. 23	Special Topics / Clinical Application		Biofeedback	— — Quiz- PNF
	Wed. Nov. 25	NO CLASS – Thanksgiving Break	—	—	
	Mon. Nov. 30	Special Topics / Clinical Application	Mock OSCE – Group A	Dry Needling / Kinesio Taping	
	Wed. Dec. 2	Special Topics / Clinical Application	Mock OSCE – Group B	Cupping/ IASTM	PT/PTA Collaboration Assignment Due
	Mon. Dec. 7	Special Topics + Course Integration	Lab Review – Group A	Blood Flow Restriction (BFR)	—
	Wed. Dec. 9	Comprehensive Course Review	Lab Review – Group B	—	Final Exam / OSCE Preparation
	Dec. 14–18	FINALS WEEK	OSCE – TBD	—	Written Final Exam – TBD
